

The core asset of the modern business enterprise is not in buildings, machinery, or real estate, but...

... in the intelligence, skills, and experience of its employees.

The challenge is finding the balance between what the company pays for health care and the need for a motivated, productive workforce.

Through BCA's long standing relationships with health care providers, we have successfully achieved this balance while saving companies an average of 15-20% on their health care costs.

Commercial Benefits Services

BCA has been providing first-class employee benefits services to local and national companies for almost two decades. BCA recognizes the impact of rising healthcare costs on businesses and made it our goal to devise and implement cost savings measures.

Our strategies have provided relief for many of our clients. Even during times when health insurance rate increases stand at unprecedented levels we continue to save our clients hundreds of thousands of dollars. We have every confidence that we will be able to pass on similar savings to you, your employees and the entire program of benefits.
